Gate Valves

Gate valves to DIN/EN in pressure seal design

AKG-A/AKGS-A

Main applications

- Fossil-fuelled power stations
- Process engineering
- Boiler feed applications
- Boiler recirculation
- Chemical industry
- Petrochemical industry
- Sugar industry
- Mining
- Descaling units
- Paper industry / pulp industry
- Shipbuilding
- Snow-making systems
- Nuclear power stations

Fluids handled

- Water
- Steam
- Other non-aggressive fluids such as gas or oil on request.

Operating data

Table 1: Operating properties

Characteristic	Value
Nominal pressure	PN 63 - 160
Nominal size	DN 65 - 300
Max. permissible pressure [bar]	160
Min. permissible temperature [°C]	≥ -10
Max. permissible temperature [°C]	≤ +550

Selection as per pressure/temperature ratings (⇒ Page 6)

Valve body materials

Table 2: Overview of available materials

Material	Material number	Temperature limit
P 250 GH	1.0460	≤ 450 °C
13 CrMo 4-5	1.7335	≤ 550 °C

Design details

Design

- Pressure seal design
- Non-rotating stem
- Split wedge
- Yoke head suitable for mounting electric and pneumatic actuators (DIN ISO 5210)

Variants

- Position indicator
- Limit switch(es)
- Drain branch
- Hard-faced back seat
- Disc spring supported yoke head
- Parallel discs
- Bypass
- Spur gear
- Bevel gear
- Electric actuators
- Pneumatic actuators
- Actuating bush for remote actuation
- Other flange designs
- Other butt weld end versions
- Inspections to technical codes such as AD2000 or to customer specification

Product benefits

- Additional features ensure safe sealing to atmosphere:
 - Pressure seal bonnet. Low risk of leakage, particularly at high pressures and temperatures.
 - Graphite gland packing with packing end rings.
- Reliable, tight shut-off and service-friendly design
 - Wedge holder with flexibly mounted split wedge. Precise alignment of wedge discs with body; wedge discs are easy to replace.
 - Actuating moments are absorbed by the wedge holder guided in the body. No additional loads on the wedge discs and the seat/disc interface.
 - Standard DIN/ISO top flange at the yoke head simplifies actuator mounting.
- Additional safety and blow-out protection by standard back seat.
- Long service life and high functional reliability
 - Stop nut as standard. Limited wedge action prevents jamming in closed position and ensures reliable opening of the gate valve even in the event of temperature transients.
 - Of the gland packing due to non-rotating stem with burnished shank.
 - Threaded bush runs in ball bearings for smooth actuation.
 - Hard-faced seat/disc interface made of wear-resistant and corrosion-proof 17 % chrome steel or Stellite.

Product information

Product information as per Regulation No. 1907/2006 (REACH)

For information as per European chemicals regulation (EC) No. 1907/2006 (REACH) see <https://www.ksb.com/en-global/company/corporate-responsibility/reach>.

Product information as per Directive 2014/34/EU (ATEX)

The valves do not have a potential internal source of ignition and can be used in potentially explosive atmospheres, Group II, category 2 (zones 1+21) and category 3 (zone 2+22) to ATEX 2014/34/EU.

Product information as per Pressure Equipment Directive 2014/68/EU (PED)

The valves satisfy the safety requirements of Annex I of the European Pressure Equipment Directive 2014/68/EU (PED) for fluids in Groups 1 and 2.

Product information as per UK Equipment and Protective Systems Intended for Use in Potentially Explosive Atmospheres Regulations 2016

The valves do not have a potential internal source of ignition and can be used in accordance with the UK's Equipment and Protective Systems Intended for Use in Potentially Explosive Atmospheres Regulations 2016 in potentially explosive atmospheres, Group II, category 2 (zones 1+21) and category 3 (zone 2+22).

Product information as per UK Pressure Equipment (Safety) Regulations 2016

The valves satisfy the safety requirements of the UK Pressure Equipment (Safety) Regulations 2016 (PER) for fluids in Groups 1 and 2.

Purchase order specifications

Please specify the following information in all enquiries or purchase orders:

1. Type
2. Nominal pressure
3. Nominal size
4. Operating pressure
5. Differential pressure
6. Operating temperature
7. Material
8. Fluid handled
9. Flow rate
10. Pipe connection
11. Variants
12. Reference number

Always indicate the original serial number and the year of construction when ordering spare parts.

Variants

Fig. 2: Variants

Body pressure relief valve

 Also refer to type series booklet 7300.1.

Fig. 3: UGS/UGSV body pressure relief valve on gate valve in pressure seal design

①	200 mm minimum distance	②	Body pressure relief valve for both flow directions
③	Insulation	100	Body
131.2	Connection branch	710	Pipe, not included in KSB's scope of supply
731	Pipe union		

A body pressure relief valve is necessary if, with the gate valve closed, there is a danger of the liquid trapped inside the valve body heating up and causing an unacceptable pressure increase inside the valve. A warning sign is affixed to the yoke arm near the name plate.

All gate valves with pressure seal bonnet are factory-supplied with a closed connection branch 131.2 with connection dimensions $\varnothing 22 \text{ mm} / \varnothing 14.1 \text{ mm}$ suitable for pipe $\varnothing 21.3 \text{ mm} \times 3.6 \text{ mm}$.

Fig. 4: Closed connection branch for body pressure relief valve

④	Welding groove	⑤	When connecting to pipe 710, cut here and bevel the face to obtain a welding groove.
131.2	Connection branch		

When ordering please state whether a pressure relief valve is to be provided, or whether excess pressure is to be released via a bypass and/or a relief hole in the inlet-side seat ring 515. In those cases, the gate valves can be used for one flow direction only.

i The pressure relief valve must not be welded directly to connection branch 131.2 but must be connected to it via an intermediate pipe 710 in a vertical, upright position outside the insulating material. The minimum distance to the insulation is 200 mm.

9 Nominal size / seat diameter
10 Model with reduced bore on request
11 Open
12 Vertical clearance for removal

Mating dimensions as per standard

Face-to-face lengths: See table
Butt weld ends: See table
Weld groove form: DIN EN ISO 9692-1 (1.3 + 1.5)

Different designs of butt weld ends and weld groove forms are possible, but only within the dimensions $A_{\max.}$ and $B_{\min.}$.
Butt weld ends to EN 12627 are possible.

Installation instructions

The gate valves are designed for a max. differential pressure equal to the permissible operating pressure.

If a bypass is necessary or requested for other reasons, a NORI 320 ZXSV globe valve as per type series booklet 7640.1 is fitted as bypass valve. The nominal size of the globe valve depends on the nominal size of the gate valve (see table).

Table 9: Nominal size of bypass valve

Gate valve seat diameter	Nominal size of bypass valve
S 80 - 150	DN 15
S 200 - 250	DN 25
